

# WKŁADKI

## Wkładka do tworzyw / metalu z nacięciem typ CI

**Materiał:** Mosiądz, stal hartowana ocynkowana, stal nierdzewna A2

**Przeznaczenie:**

Wkładki typu CI są przeznaczone dla tworzyw sztucznych oraz różnego rodzaju metali. Posiadają nacięcie samogwintujące. Ze względu na rodzaj materiału z którego są zrobione posiadają wiele zastosowań.

| Nr wkładki | Gwint M | S    | L    | N         | B         | T    |
|------------|---------|------|------|-----------|-----------|------|
